Hello! I'm a full-stack web developer with 3 years of experience in Web development. I'm currently based in Nairobi, Kenya and I'm interested in freelance web development projects. Here is a summary of my education, skills, and experience:

EDUCATION

Murang'a University of Technology

September 2021 - April 2025

- Bachelor of Science in Computer Science

SKILLS

- **Languages:** HTML5, CSS3, Python, JavaScript (ES6), PHP
- **Frameworks:** Flask, React, Angular, Django, Bootstrap5.
- **Tools and skills:** Git, GitHub, AWS, Heroku, Digital Ocean, Netlify, Vercel, PostgreSQL databases, Linux, Rest APIs, CI/CD, Full-Stack development.

PROJECTS AND EXPERIENCE

1. [Simulizi](#) - Designed and developed a website for a freelance poem and sports blogger.
 - Technologies Used:
 - HTML, CSS, Typescript, Nodejs .
 - Role:
 - Singlehandedly designed and developed the website both frontend and the backend functionalities.
 - Increased the author's audience reach to a wider online demographic.
2. [Evently](#)- site where people can organize local events (e.g., concerts, community meetups, or workshops) and attendees can register. Event organizers can track attendance, promote events, and manage feedback.
 - Technologies Used:
 - HTML, CSS, Javascript, React, Nextjs, MongoDB.
 - Role:
 - Designed and developed the website from scratch i.e. frontend and the backend of the website.
3. [Newsroom](#) - Newsroom is a web application where users can view the

latest news updates from trusted media outlets around the globe.

- Technologies Used: HTML, CSS, Javascript, Flask web framework, and SQLite.

- Role:

- Responsible for the design and implementation of both the frontend and the backend functions.

4. [Delani Studio](#) - This is an online fictional studio created using HTML, CSS, and Javascript.

- Technologies Used:

- HTML, CSS, Javascript

- Role:

- Designed the website and implemented UI/UX

5. [Beauty with AI](#) - An application that recommends personalised skincare and makeup products based on the skin metrics inferred from user's selfie, using Computer Vision algorithms submitted for Yash Technologies Case Competition ..

- Technologies Used:

- HTML, CSS, Javascript

- Role:

- Design and development of the website.
